Food-Grade Plastic Packaging Bottles & PET Preforms

TABLE OF CONTENT

Protein Powder Jars

02

Wide-mouth PET & HDPE jars for protein powder, nutritional supplements and bulk food powders. Various volumes and custom lid solutions available.

Squeeze Sauce Bottles

04

Flexible food-grade squeeze bottles with pointed nozzles, ideal for ketchup, mustard, salad dressings and all kinds of condiment packaging.

PET Preforms

06

High-quality PET preforms in standard neck sizes: 28mm, 30mm, 38mm, 45mm, 48mm, 55mm, 72mm. Custom colors, weights and materials for your blow-molding requirements.

Vitamin & Capsule Bottles

08

Rigid plastic containers for tablets, capsules and healthcare supplies. Suitable for nutrition products and medical-grade packaging applications.

PROTEIN POWDER JARS

Custom Food-Grade Plastic Protein Powder Jars

- ✓ Food-grade raw material (PET & HDPE), safe for protein powder and nutritional powder packaging
- ✓ Multiple capacity options: 60ml-7570ml / 1oz-2GAL
- ✓ Custom service: logo printing, adhesive labels, special colors & new mold development
- ✓ Excellent sealing with various lids, providing reliable moisture-proof performance for dry powder
- ✓ Flexible order quantity: small trial orders and large-volume bulk wholesale are both welcome
- ✓ Compliance certificates: FDA, EU Food Contact, LFGB and ISO for different market standards
- ✓ Over 5000 ready molds available, saving your mold cost and production lead time
- ✓ Stable output with strict in-house quality inspection before every shipment

Key Specifications

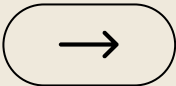

Parameter	Specification
Product Name	Plastic Protein Powder Jar for Food & Supplement
Material	Food-grade HDPE (opaque, standard); PET (transparent, optional), BPA-Free. PP for lids.
Capacity	60ml / 100ml / 300ml / 500ml / 1000ml / 2000ml / 3785ml / 7570ml (1oz-2GAL, customizable)
Neck Size	68mm / 82mm / 100mm (customizable)
Cap Type	Screw cap / Tamper-evident cap / Flip-top lid (PP material)
Color	White as stock; custom Pantone colors available
Surface Finish	Glossy / Matte / Frosted
Logo Printing	Silk Screen / Offset / Heat Transfer / Self-adhesive Label
Temperature Range	-20°C ~ 80°C for jar body; lids (PP) up to 100°C for short-term use
Certification	FDA / LFGB / SGS / ISO9001
MOQ	5,000 pcs for custom color & printing; negotiable for stock items
Sample Time	3-5 days for stock samples; 7-15 days for custom mould
Lead Time	15-25 days after deposit & artwork confirmation
Packing	Standard export carton; pallet packing available
Payment Terms	T/T (30% deposit, 70% before shipment), L/C at sight
Application	Protein powder, sports nutrition, dietary supplement, food powder, spice powder

SQUEEZE SAUCE BOTTLES

Food Grade Squeeze Bottles for Sauce Liquid Condiments

- ✓ Made of 100% food-grade, BPA-free HDPE, safe for ketchup, honey, syrup and all kinds of liquid food
- ✓ Multiple available volumes: 100ml-1000ml to fit different market and package requirements
- ✓ Full custom service: custom capacity, Pantone colors, logo printing, labels and surface finishing
- ✓ Leak-proof structural design with matched caps, prevents spills during transport and storage
- ✓ Ergonomic soft curved bottle body, comfortable grip, easy to squeeze and control liquid output
- ✓ Compliance certificates: FDA, EU Food Contact, LFGB and ISO for global market access
- ✓ Over 5000 ready molds in stock, saving your new mold cost and shortening production lead time
- ✓ Stable mass-production capacity with strict in-house quality inspection before every shipment

PET PREFORMS

Product Introduction:

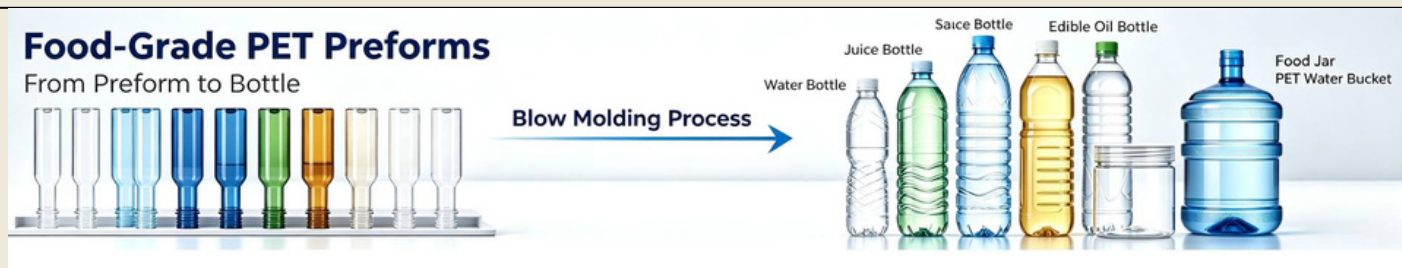

We supply food-grade PET bottle preforms designed for food, beverage, nutritional edible oil and cosmetic packaging. Our preforms feature stable material performance, consistent wall thickness and good blow-molding compatibility. Suitable for mass-production bottle manufacturing, supporting customized specifications to meet diverse global packaging demands.

Application Scenarios

- Food & beverage packaging: juice, water, carbonated drinks, edible oil, condiment bottles
- Nutritional supplement packaging: protein powder, health supplement plastic bottles
- Cosmetic & personal care: lotion, shampoo, body wash containers
- Household chemical products: detergent, cleaning agent bottles
- Industrial packaging: various plastic container blow-molding production

Product Advantages

- Food-grade raw material: Made of qualified food-contact resin, safe for food and supplement packing, compliant with international packaging standards.
- Stable molding performance: Uniform wall thickness, low defect rate, high yield during blow-molding processing.
- Customizable specifications: Support multiple sizes, neck finishes and material options (PET / HDPE) to match your bottle project requirements.
- Consistent batch quality: Strict production control, stable performance across different production batches.
- Cost-effective bulk supply: Competitive bulk pricing for large-volume orders, helping buyers lower overall production cost.
- Good compatibility: Fits mainstream blow-molding equipment, easy for factory mass-manufacturing.

Technical Scope of Our PET Packaging Products

We specialize in manufacturing food-grade PET packaging products, including PET preforms, matching bottle caps, carrying handles, float ball accessories, disposable & reusable plastic buckets. All items are compatible with injection stretch blow molding (ISBM) technology, widely applied in drinking water, beverages, food, daily chemicals, pharmaceutical and water treatment industries. Our full technical capability range is listed below:

1. PET Preforms

- Neck sizes available: 28mm / 30mm / 38mm / 45mm / 48mm / 55mm / 72mm / 120mm
- Neck styles: short neck, high neck, thick thin neck, threaded neck, press-fit neck, tall neck, fine thread & long thread designs
- Weight range: 10g – 800g
- Length range: 6.85cm – 42cm
- Features: uniform wall thickness, stable crystallinity; standard stock sizes & custom mold development supported

2. Matching Bottle Caps

- Fully compatible with all corresponding neck sizes of our PET preforms
- Cap types: standard flat caps, folded water caps, sterile caps, carbonated drink caps, dip-molded caps, one-piece caps, multi-piece press-fit caps with silicone gaskets
- Weight range: 1.25g – 12.9g
- Advantages: food-safe material, reliable leak-proof & tamper-evident performance, suitable for high-temperature sterilization and carbonation pressure resistance

3. Carrying Handles

- Fits 28/30/38/45/48/55mm necks and 5L to 18.9L reusable buckets
- Styles: non-stackable handles, stackable ring handles, comfort wide grips, bucket side handles, Wahaha-style handles
- Weight range: 2.1g – 56g
- Stable load bearing, easy manual & automatic assembly

4. Float Ball Series

- Complete sets: float ball preforms, float ball caps and float ball tails
- Preform weight range: 31.5g – 49g
- Food-grade raw material, excellent tightness and stable buoyancy for water tank & liquid level control systems

5. Disposable & Reusable Water Buckets

- Volume capacity: 5L up to 18.9L (3-gallon / 4-gallon / 5-gallon options)
- Bucket weight range: 230g – 800g
- Neck options: threaded neck, press-fit neck (with or without support ring)
- Blow molded food-grade PET, odor-free and high impact resistance, suitable for bulk filling and full-truck shipment

Packaging and Shipping

- Preforms are packed in sturdy cartons with protective inner layers to avoid scratches and deformation during transit. Each carton is marked with product model, quantity and shipping information for easy warehouse management.
- **Shipping Cost & Tariff Benefits** of Bottle Preform Shipment
- Shipping bottle preforms instead of finished bottles brings obvious economic advantages for importers:
- **Space saving:** Preforms take much less container space compared with finished hollow bottles. More goods can be loaded per container, reducing unit freight cost.
- **Lower import tariff:** In many countries, bottle preforms enjoy more favorable tariff rates than finished plastic bottles. It helps importers cut customs duty expenditure significantly.
- **Reduced damage risk:** Compact preform shape is less prone to breakage and collision damage during long-distance sea or air transport.
- **Flexible local production:** Buyers can blow-mold preforms into finished bottles at local factories, realizing on-demand production and cutting finished-goods inventory pressure

FAQ

Q: What materials are your bottle preforms made of?

A: We provide PET food-grade preforms, both are safe for food and supplement packaging.

Q: Can I get custom-size bottle preforms?

A: Yes. We support customized neck size, weight and material according to your bottle design requirements.

Q: Are your preforms compliant with food contact standards?

A: Yes, our raw materials meet international food contact safety requirements for food and beverage packaging.

VITAMIN & CAPSULE BOTTLES

Vitamin and Capsule Plastic Bottles | Food-Grade

- ✓ Food-contact safe plastic material for tablets, capsules and vitamin supplements
- ✓ Optional child-proof & desiccant caps, available in mini, medium and large volumes
- ✓ Matte or glossy surface finish, supports silk screen printing, hot stamping and labeling customization
- ✓ Multiple bottle colors: amber brown, clear transparent, opaque white; custom Pantone colors available
- ✓ Excellent moisture barrier performance, well-protect moisture-sensitive health ingredients
- ✓ Ideal packaging for global health supplement & nutraceutical brands
- ✓ Strict pre-shipment inspection including leak test & appearance check
- ✓ Supported custom mold development for exclusive designs

Reliable Inner Sealing Gasket Tight Thread Sealing Structure Custom Brand Printing Available

Key Specifications

Item	Specification
Material	Food-grade HDPE (standard, opaque with good moisture barrier), PET (transparent optional), BPA-Free; PP for caps
Capacity	15ml, 30ml, 60ml, 100ml, 120ml, 150ml, 200ml, 250ml, 300ml, 500ml; custom volumes available
Neck Size	38-400, 45-400, 53-400 and other customized neck finishes
Bottle Color	Amber, natural white, opaque white, clear; custom colors by Pantone code
Surface	Glossy / Matte
Cap Types	Screw cap, child-resistant cap (CRC), flip-top cap, desiccant cap, press-on cap
Wall Thickness	Standard thickness; reinforced stacking version is optional
Working Temp.	-20°C ~ +80°C (for HDPE body)
Custom Service	Silk-screen printing, hot stamping, sticker label, embossed logo, new mould development
Quality Control	Raw material check, online monitoring, leak test & full appearance inspection before packing
Compliance	ISO9001, food-contact safe, can meet FDA / LFGB requirements
Export Packing	Inner poly bag + export carton; pallet service for full container
Suitable for	Vitamin tablets, capsules, dietary supplements, herbal pills and other solid health products
